

Schüco PV Light 'Roof-Mounted'

Whether the base profiles are positioned vertically or horizontally, the PV Light 'Roof-Mounted' installation system allows you to attach standard photovoltaic modules to a wide variety of roof types easily and securely – and adapt them to suit local conditions. Schüco provides the appropriate roof anchor points for all standard pantiling and roofing types, such as slate, plain tile, wave designs and various other tile shapes. By combining these with the different installation options, you can find the perfect fixing method for almost every roof-mounted installation.

- For all available types of roof
- Suitable for angles of pitch between 10° and 60°
- Base profiles can be mounted vertically or horizontally

Aluminium roof anchor points from Schüco – a solution you can trust.
